

# TruStop Angle Control Stop with TruCheck

**No Need to Shut Off the Water!**

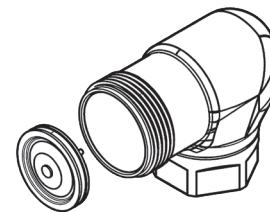

**Fits Any Manufacturer's Flush Valve!**  
 (with NON-ground joint connection)

## How it Works:

The TruStop is a revolutionary flush valve control stop that allows you to repair the unit without shutting off the water to the restroom or an entire floor. The game changing design puts the TruCheck backcheck assembly on the flush valve side of the stop instead of the supply side. To shut off the water, simply insert the hydrant key into the stop, and make a quarter turn. The ball valve inside will stop the flow. This enables you to repair a flush valve while all of your other flush valves, faucets, etc. remain in use. The TruStop is vandal resistant, and will last for decades, resulting in lower maintenance costs.
