

CRAPSHOOTER

*Clear your drains quickly
and easily with this
lightweight, easy to
transport sewer jetter!*

#86800

The Crapshooter is a lightweight, powerful, and self-contained sewer jetter that's easy to carry anywhere! It generates 1500 psi and runs off an ordinary 15 amp circuit. It's the only sewer jetter currently on the market that weighs under 25 lbs and costs less than a thousand dollars. There will be no loss of water pressure, and no wasted time searching for a proper outlet.

The Crapshooter comes with a 50 ft. long high pressure hose and two heavy duty nozzles designed to handle up to 3" pipes. Two different faucet adapters allow you to hook the unit up just about anywhere. All fixtures and hoses can handle up to 120° water temperatures.
