

TIGHT SEAL GASKETS

A Revolutionary Change in Toilet Sealing!

Tight Seal Gaskets are unlike any toilet seal gasket you've ever seen before! They are made of a special sticky elastomer that won't melt in the heat, and won't get hard in the cold. Tight Seal Gaskets spring back to their original shape when squeezed. They won't spread or get smashed like wax rings do. This ensures a tight seal, and allows you to reposition a toilet without ruining the gasket. It also allows for movement of the fixture without leaking. This amazing material enables you reuse these gaskets when replacing a toilet or urinal. They remain resilient and flexible, and will not break or become brittle. Tight Seal Gaskets are a dream for any plumber or maintenance person!

- Won't Melt or Become Hard
- Reusable
- Springs Back to Shape When Squeezed
- Allows Repositioning of Fixture
- Sticky Elastomer Ensures a Tight Seal
