

REACH THE SINK, NOT YOUR LIMITS

- ✓ Loved by children, parents & little people
- ✓ Perfect safety record
- ✓ Self-retracting technology
- ✓ Slip-free, trip-free, hands-free
- ✓ Trusted since 2007

Trusted by 30,000+ customers, including:

Hilton
HOTELS & RESORTS

Step 'n Wash step stools provide a **safe boost** for children and little people. A concealed spring and damper provide controlled, automatic retraction, keeping the step **safely folded out of the way** when not in use.

Step 'n Wash

Technical Data Sheet

Step 'n Wash Stainless Steel Step Stool

Model: SW-975

Legacy model number SNW-SS 975B

Product Materials

Side supports constructed from one contiguous sheet of formed 12 gauge type 304 stainless steel.

Step constructed from 16 gauge type 304 stainless steel and reinforced with 16 gauge stainless steel welded bracket.

Step features marine grade non-slip safety surface, rounded corners, and ANSI-compliant graphics in English, Spanish, and French.

Operation

Floor-mounted, self-retracting step. Concealed spring and damper provide controlled lowering and automatic retraction of the step. Load capacity of 800 lbs.

Installation

Secured to floor directly under lavatory utilizing 4 stainless steel 3/8" wedge anchors (supplied). Front mounting holes must be a maximum of 6" and a minimum of 5.5" from the front edge of lavatory. Please refer to the installation instructions and installation template for further details.

Logistics

Packaged weight: 20 lbs

Packaged dimensions: 21" x 10" x 16"

Pallet count: 24

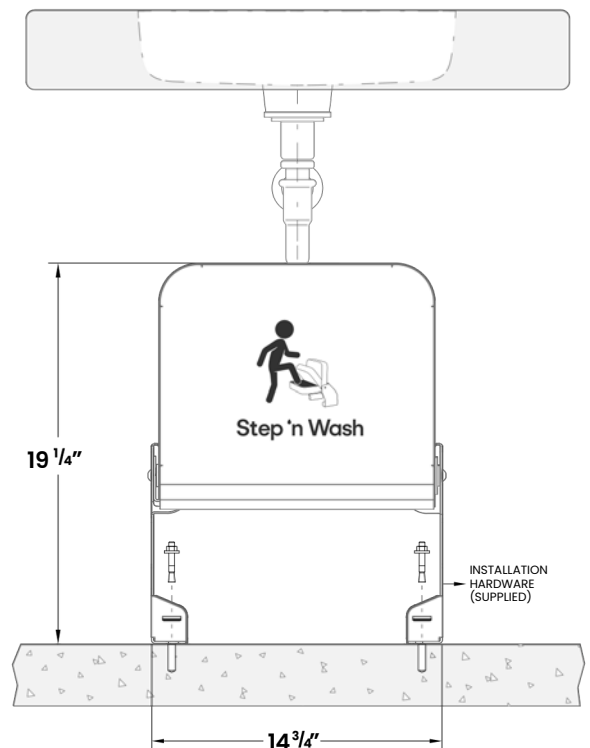

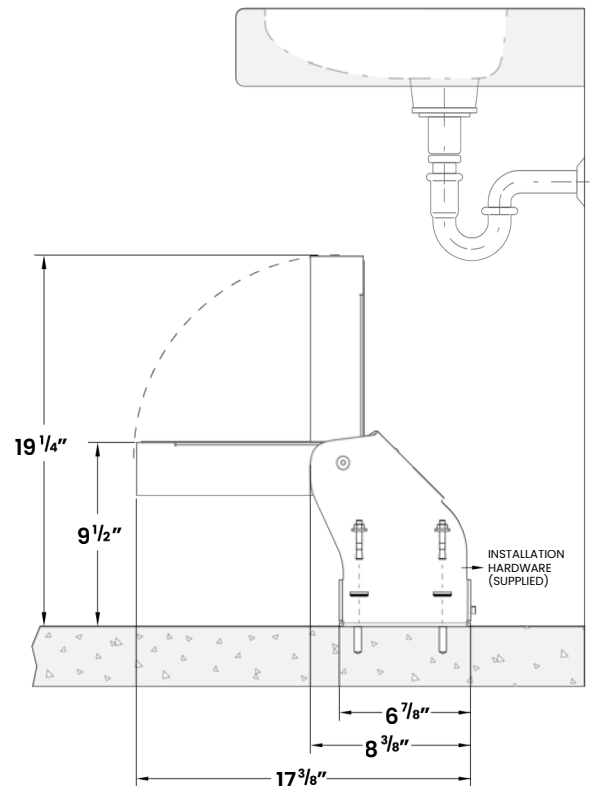

Pallet type: US

Standard Warranty

Major stainless steel components will be free from defects in material and workmanship for a period of 5 years.

Step 'n Wash

Certification of Product Equivalence

Model: SW-975

January 1st, 2026

This document serves as the official manufacturer certification that Step 'n Wash model SW-975 is a form, fit, and function replacement for the legacy model SNW-SS975B.

Verification of Compatibility

Model SW-975 was engineered to ensure 100% interchangeability with existing facility standards and architectural details:

- **Mounting Pattern:** Model SW-975 utilizes the identical four bolt floor anchor pattern as the previous model.
- **Footprint:** The unit occupies the same floor area and requires the same operational clearance.
- **Standardization:** No modifications to floor plans or installation details are necessary for either new construction or replacement projects.
- **Functional Equivalence:** Model SW-975 meets or exceeds all performance specifications established by the legacy model.

Summary of Lifecycle Improvements

While the installation requirements remain identical, model SW-975 incorporates several upgrades focused on hygiene and durability:

- **Hygienic Anchor Shields:** Integrated stainless steel covers hide floor hardware to prevent the accumulation of debris and moisture.
- **Refined Aesthetics:** Rounded corners provide a modern look and improve user safety in high traffic environments, and a laser-marked logo compliments high-end washroom fixtures.
- **Enhanced Retraction:** An upgraded mechanical system provides smoother operation and a longer service life.
- **Streamlined Build:** Reduced hardware exposure and fewer exposed bends facilitate faster and more effective cleaning.

Conclusion

Model SW-975 is the direct successor to model SNW-SS975B. It should be accepted as a direct substitute in all project submittals, facility manuals, and maintenance catalogs without the need for project or site modifications.

Sincerely,

Jacob Fedosky
President, Step 'n Wash LLC
